Story

I

Tehran → Paris, at ten

She is ten when she leaves Tehran for Paris, where her father is pursuing his academic research. She grows up in a demanding household devoted to knowledge, between two languages and two alphabets. Much is expected of the mind at home, and she keeps a taste for hard work. That double belonging now runs through everything she does, from Persian song to the Paris runways.

II

By day, numbers

She follows the sciences all the way to a degree in informatics and mathematics. By day she proves, calculates, structures. By night, far from the lecture halls, she sings, models and trains. Two lives run side by side for years with the same rigour, and kept secret for a long time. That discipline, learned from equations, is what later carries her onto every stage.

III

Form

Then the night takes over. Crowned Miss Eco Persia 2025/2026, she walks the red carpet at the Festival de Cannes in 2026. Today she lives in Paris and pursues five disciplines at once: model, fashion designer, singer from Persian tradition to French pop, painter and competitive boxer. One thread ties them together: the art of being a woman, with elegance and with strength.
